PROPERTIES

Duration: 30min
Location: Local Development
Participants: Developer, Architect

0.1 Agenda

- Test package import functionality
- Verify template rendering
- Check styling consistency

0.2 Discussion Points

This is a test to verify that our new package architecture works correctly.

0.2.1 Code Testing

Here's some inline code `import package` and a code block:

```
#import "packages/typstwriter/lib.typ": meeting
#show: meeting
```

0.2.2 List Testing

- First item
- Second item with **bold** text
- Third item with *italic* text

0.3 Action Items

- [x] Create package structure
- [x] Implement basic templates
- [] Test advanced components
- [] Refactor existing templates

0.4 Conclusion

If this document renders correctly, the basic package infrastructure is working!
